

Workshop on High Performance Computing – WOHPC 2016

20th – 21st March, 2016

Organized by

Department of Physics, Panjab University,
Chandigarh

The easy availability of extreme computational power on the personal computer is drastically changing the way number crunching is done. Today a myriad of parallel computing techniques on multi-core processors and novel architectures like the GPUs and FPGAs have brought in a revolution in the high performance computing. This workshop is intended to address the issues faced by a generic user in handling the enormous computing power available in terms of tools, techniques and optimization.

Topics

- *Architecture*
- *Programming*
- *Environments*
- *Optimization*
- *Applications*

Organizing Committee

Devinder Mehta
Vipin Bhatnagar
Ashok Kumar
Sunita Srivastava
Abhimanyu Chawla

Registration Deadline: 18th May, 2016, **Registration Fee:** Rs. 500
